Contents of Volume 3

Vol. 3, No. 1

Spectroscopy and the coatings industry: a review 1
R. H. Grieser (Clifton, N.J.)

Blocked isocyanates 73
Z. N. Wicks, Jr. (Fargo, N. Dak.)

Vol. 3, No. 2

Surface dynamics of defect formation in paint films 101
G. P. Bierwagen (Chicago, Ill.)

Die UV-Härtung ungesättigter Polyesterlacke 115
H.-G. Heine and H.-J. Traenckner (Krefeld-Uerdingen)

Perspectives d'avenir pour les peintures en poudre 141
R. Clement (Thiais)

Stability of emulsions 177
F. Harusawa and T. Mitsui (Yokohama)

Vol. 3, No. 3

Nacreous pigments 191
S. Hachisu (Tokyo, Japan)

Solvent retention in organic coatings 221
D. J. Newman and C. J. Nunn (Egham, Surrey, Gt. Britain)

Temperature dependence of the physical properties of crosslinked polymers . . . 245
K. Shibayama (Amagasaki, Japan)

The measurement of pigment dispersion in paints and paint films 261
M. R. Hornby and R. D. Murley (Cleveland, Gt. Britain)

Vol. 3, No. 4

The reduced pigment volume concentration as an important parameter in interpreting and predicting the properties of organic coatings 281
G. P. Bierwagen and T. K. Hay (Chicago, Ill., U.S.A.)

Some relationships between the preparation and application of photoluminescent materials and inorganic pigments 305
W. L. Wanmaker and J. L. Ouweltjes (Eindhoven, The Netherlands)

Bestimmung des Benetzungsverhaltens von Pigmenten 323
P.-J. Sell and D. Renzow (Stuttgart, Germany)

A new mechanism of the physical film-forming process 349
T. Krzyzanowska (Gliwice, Poland) and Z. Hippe (Rzeszow, Poland)

Viscosity variation and solvent balance in water-soluble coatings 361
L. W. Hill and L. B. Brandenburger (Fargo, N. Dak., U.S.A.)
